

Installation Manual

Windows

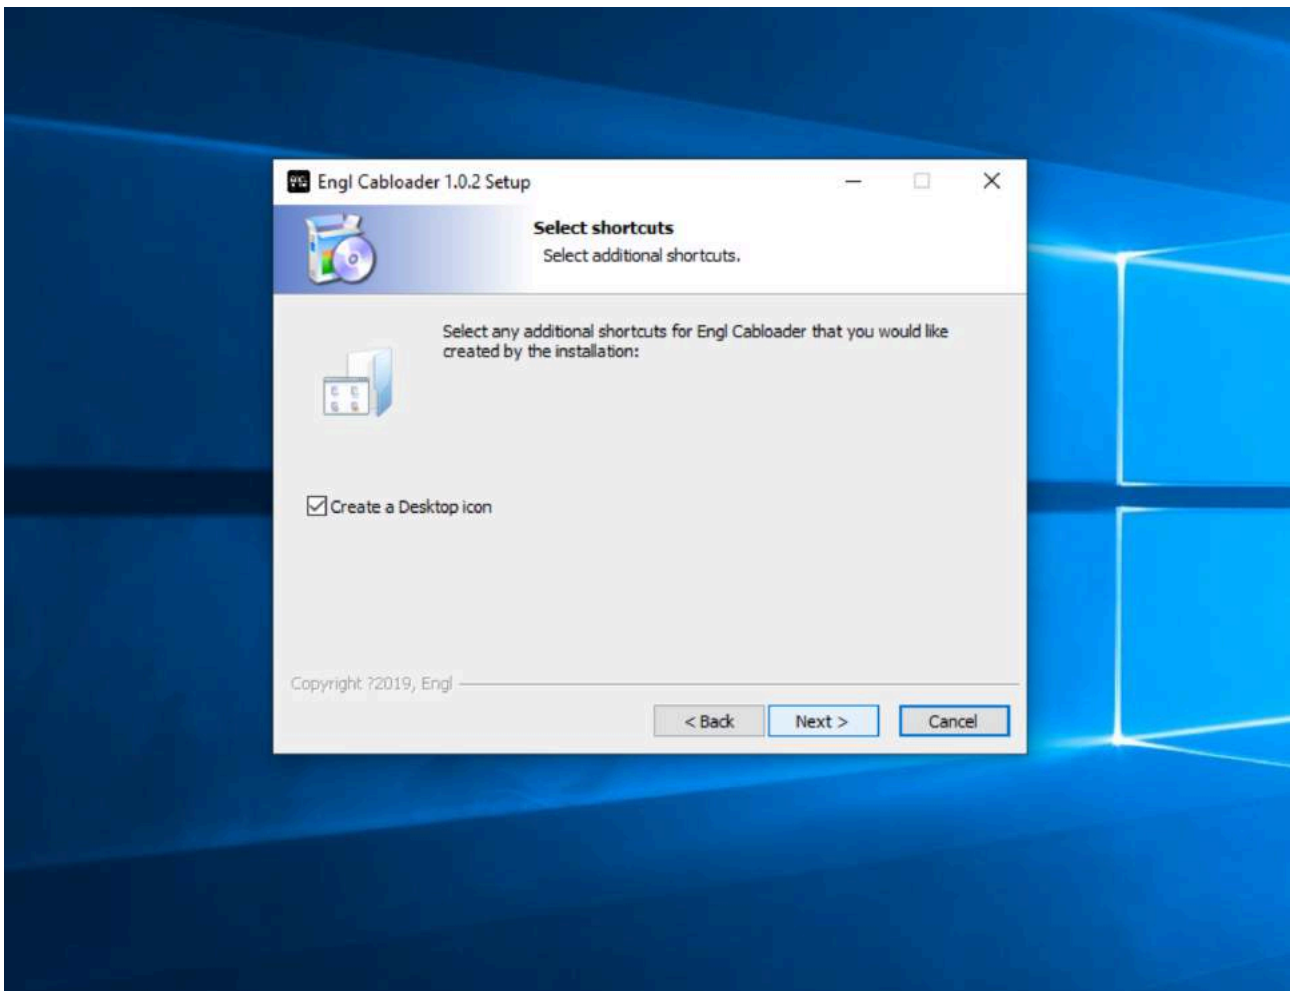

1. Installation

Download the Windows software installer from the Engl Amps homepage and open the downloaded .exe file in your download folder. The Setup Wizard will welcome you to the installation. Press „Next“ to continue.

Choose a path for the installation. We recommend the default installation folder. Click „Next“ to continue the installation.

In the following screen you are able to choose if you want to have a shortcut for the Engl Cabloader software on your desktop. Press „Next“ one more time and press „Install“ in the following window. The installation process should not take more than a few seconds. After the installation is completed press „Finish“.

2. First launch

Before you launch the Cabloader software always make sure that your Cabloader pedal is attached to your computer with an USB cable.

Launch the Engl Cabloader software by double-clicking the shortcut on your desktop, if you created one. If you have not created a shortcut you'll find the application in the folder C:\Program Files (x86)\Engl\Engl Cabloader\CAB_LOADER.

3. Uninstall

If you ever want to uninstall the Engl Cabloader software navigate to the folder C:\Program Files (x86)\Engl\Engl Cabloader. You'll find an uninstall script there. Simply run the script by double clicking and the Cabloader software will be uninstalled.
